**Government bodies
& training agencies**

Specialist solution for learning pathways

The eTraining Company has been providing tailor-made e-learning solutions for years, making it possible to offer participants a complete learning path. Online training courses can be alternated with live presentations, webinar sessions and knowledge quizzes.

To get a good impression on how our portals work and experience the training method yourself, you can log on to the following portal:

uk.etraveltraining.eu

The screenshot shows the ETravelTraining website interface. At the top left is the logo 'ett etraveltraining'. The navigation menu includes 'Home', 'Training courses', 'Sales Toolbox', and 'Help'. On the right, there are flags for Germany, France, Spain, Italy, and Sweden, followed by a 'Login' dropdown. The main content area features a large image of a person taking a photo. Below this, a 'Welcome' section contains a message about the platform's focus on the travel industry and a 'Good luck' sign-off. To the right is a 'Login / register' form with fields for 'Username / e-mail address' and 'Password', and buttons for 'Login' and 'Register now'. A link for 'Forgot login/password?' is also present. At the bottom, there are two landscape images and a 'Partner platforms' section with a button to 'Click on the button to go to some of'.

You can use the following login codes to enter the platform as a user

Username: Exampletravel!
Password: Exampletravel!

Strong solution

Specially for HR departments, training agencies, but also for government bodies in general we offer a very effective elearning solution with some unique selling points. Besides a user-friendly learning portal, a user-friendly CMS (with which you can easily compile your own modules) and our user-friendly, visually attractive training technique, we offer a number of unique extras which you find here below.

Our solution includes:

a recognisable elearning portal that we produce for you, in your colours, look & feel and appearance

automated and personalised certificates that participants can download from the portal after completing each part of the learning path

an internal communication system with which you can inform, stimulate and enthuse your users individually or by group

various motivational tools including a knowledge quiz module and a level system

an automated registration function for extra learning activities that can be linked to a minimum result to be achieved for the online courses.

the possibility to use our green-screen room (Zoetermeer) to record a semi-live training yourself

Creative, Effective, Interactive

With the ETraining Dashboard, we are able to offer you a well thought-out and user-friendly e-learning portal. With the help of sophisticated tools, we create an entirely personalised learning website for your organisation, in which you can indicate exactly what learning path you offer to your students/participants. Through simple and clear navigation, the processing time to get to know the program is not more than 2 minutes. An important factor! After all, you want to inform not irritate! your target groups.

In addition, with our technology you have a method that is not only efficient but also proven effective. Users are actively involved in the modules. Not just by answering a simple multiple choice question now and then, but by having them click, drag and drop, think about statements and ask them to solve (fun!) questions. The modules also have a strong visual appeal. No books online, no overkill of information, but learning in a way that is appealing and effective.

Would you like to know more about our product, the possibilities and extras? Download [our whitepaper](#) with all the benefits of ETraining Dashboard.
